

# Product Bulletin

**Product:** Lamp Support Upgrade S2

**Description:** Lamp Supports can be easily damaged during oven jams and rollovers. The delicate fins that hold the quartz lamps become bent or broken making them of no use. Before discarding these parts send to XL Engineering for a refurbishment at a fraction of the cost to replace. Our replaceable supports can be machined to any desired centerline being it standard increment or progressive. We recommend to send a quantity of damaged supports for best price.

**BEFORE**

**REPAIRED WITH NEW REPLACEABLE LAMP  
HOLDERS**
