Product: 10268077 Transfer Head Ball Bearing Upgrade Series 2

Description: XL Engineering exclusively offers our ball bearing style transfer head for all Series 2 machines equipped with standard non-pivoting head transfer arms. This design replaces the OEM bronze flange bushings with double seal ball bearings. This allows the use of increased spring pressure for positive transfers and bottle removal from the molds without premature wear; common with the bronze bushings. Our head comes standard with a **6-1/2 pound** spring compared to the OEM **3-1/2 pound** spring.

Offering: XL Engineering stocks 10268077 Transfer Head. Please contact us for pricing.
